Jawa Barat, Indonesia

Results-driven IT undergraduate with hands-on experience in software development and network administration. Proficient in Python and JavaScript, with practical knowledge of SQL databases and Agile methodologies. Experienced in applying data structures to solve real-world problems. Adept at collaborating in cross-functional teams, with strong analytical and problem-solving skills developed through academic projects and self-directed learning. Seeking an opportunity to contribute technical expertise, accelerate professional growth, and deliver value in a fast-paced, innovation-driven environment.

Projects

Harmony Tech Group - Cikarang, Jawa Barat

Member

Designed and built a remote-controlled rover robot for collecting litter, operated via a smartphone over Wi-Fi/Bluetooth. The rover features a wheeled chassis, a motorized gripper/ scoop mechanism for picking up trash, and an onboard storage bin. Movement and collection actions are controlled in real time through a mobile app interface, with live camera feed for visual guidance during operation

Lapak Kita - Cikarang, Jawa Barat

Member

A shopping website designed for students and teachers of President University Student Housing. Used to connect buyers and seller closer through online platforms, give delivery services to all President University dormitories, and as an advertisement platform for seller goods. i work as a coder for the website front end (UI/UX)

CrowdFlow - Cikarang, Jawa Barat

Project Manager

Online ticket buying . With features for event organizers such as venue mapping, and a working payment gateway for customers. CrowdFlow also provides a platform to re- sell tickets from user- to- user at an affordable cost. I work as the project manager, helping my members to record their progress and assign task with slack and trello using Agile/Scrum sprint
